Subject: gas drilling and water pollution

2010 JAN 13 AM 11:03

INDEPENDENT REGULATORY
REVIEW COMMISSION

Hello,

My name is Anna Raskin, and I am teaching at the Montgomery County Community College. I have recently learned about the water pollution that occurs during the gas drilling in Pennsylvania. I am outraged that there are no strict regulations in place to prevent water contamination by the drilling companies. I urge the state to stop giving the permits to the drilling companies until we have the environmental agencies developed and put into place the regulations that would protect the water from contamination.

thank you,

Anna
