COMMISSION**Subject:** in support of new DEP regulations for industrial waste water

To: the EQB

Because I will not be able to attend the upcoming public meetings, I am writing to voice my support for the new DEP regulations for industrial waste water that is high in TDS (total dissolved solids).

These important new regulations will limit the volume of TDS that new sources of pollution can discharge into our rivers and streams.

This will help ensure that the unfortunate drilling of the Marcellus Shale does not terribly damage Pennsylvania's waters.

Thank you for your consideration.

Sincerely,

Melissa McSwigan
