INDEPENDENT REGULATORY
COMMISSION

Please keep on top of this important issue. Don't allow the present economic climate and the lure of dollars to tempt you to soften regulations. Let's not leave future generations with problems, like we have been dealing with from abandoned mines from the past. An ounce of prevention is worth about a ton of cure, and, in so many ways, a lot less expensive to us in the long run.

Be our true guardians!

Thank you,

Pam Meade
