REVIEW (1) REGISTRATION**Subject:** comments on chapter 95 regulations

My husband and I are adamant in opposing ANY AND ALL weakenings of ANY AND ALL regulations regarding natureal resources in the state of Pennsylvania.

We are living in hard times and this is not the time to sacrifice our natural resources or our quality of life sheerly to exploit that resource. We live on a planet that is a finite thing, not an infinite and limitless thing. We must protect it from greed and short-sightedness that would rape and pillage this planet and therefore, this state.

What else can be said that is as important as protecting where one lives? For there is nowhere else to go.

Very Truly Yours,

Sharon and Park Furlong
