Subject: support for bill

THU JAN 13 AM 11:13

INDEPENDENT REGULATORY
COMMISSION

I am writing in support of raising the water quality standards as proposed in 39 Pa. B.6547. New York State and others are watching the problems our state is having with the pollution from the natural gas wells. It is unfortunate that a similar position or moratorium was not adopted by PA. before the gas companies were allowed free reign in our state. This bill will address some of the problems we will be facing.

Thank you for your attention.
