INDEPENDENT REGULATORY
REVIEW COMMISSION

Dear regcomments,

I grew up in Pa. with the results of strip mines, in the 50s. . We played on them, we fell in them, we watched them never return to normal, and we watched them pollute our water and kill the fish in Pennsylvania's streams.

I believe we should drill, baby, drill, BUT and the end of each day we should bring in the stock holders to drink the water the drillers are putting back into our environment. If they won't drink it.... shut them down.....not tomorrow or next month.....today.

God Bless America and Pennsylvania.
