Subject: Drilling for natural gas in the Marcellus Shale

RECEIVED

2010 JAN 15 PM 1:49

INDEPENDENT REGULATORY
REVIEW COMMISSION

What does it take to know that this gas drilling in the Marcellus Shale is not a good thing? Every day more and more people are being diagnosed with cancer. By this gas drilling, which in my opinion does indeed affect the water supply, it seems that our government agencies are not looking out for the people to whomz they serve but continue to supply the greed of the drillers and the developers. This is not the right thing to do for the people of Pennsylvania and I ask that "common sense" be part of the solution. Please!
