Subject: strong standards for treatment & disposal of Marcellus wastewater.

2010 JAN 15 PM 1:50

INDEPENDENT REGULATORY
COMMISSION

Please adopt stronger standards for the treatment and disposal of Marcellus wastewater in Pennsylvania. We cannot afford to destroy our drinking water and streams. Please make Pennsylvania a leader in protecting our environment and natural resources in the current quest for developing new energy sources. We should not be short-sighted about the long reaching impact of these endeavors. Thank you.
