Subject: Proposed Changes in Code 25, Chapter 95

RECEIVED

JAN 25 2010

INDEPENDENT REGULATORY
REVIEW COMMISSION

Dear Environmental Quality Board Members,

I am writing in support of the proposed rulemaking changes in Code 25, Chapter 95, Wastewater Treatment Requirements.

The Susquehanna and Allegheny Rivers as well as many other Commonwealth streams are under great stress at the present time. The present TDS loads in these rivers have already caused problems with aquatic life and unless stricter rules are enacted the problems will only get worse. We don't need to go backwards to get some gas and a few jobs, If it is worth going after, then it worth doing right.

I have another issue besides TDS which will follow in a seperate email.

Thank you for your time,
David Darby
