Subject: Gas Drilling in PA

JAN 25 2010

INDEPENDENT REGULATORY
REVIEW COMMISSION

I consider it an urgent matter for the state to take control of gas drilling and protect the environment in our state. Water is irreplaceable and once our drinking water is poisoned by careless, greedy behavior, the harm caused will outweigh any short term gains to state treasuries. Our individual profiteers willing to sacrifice their children and grandchildren for a quick buck--They have in the past and likely will continue to do so.
