**Subject:** Marcellus Shale drilling

I do not believe drilling for natural gas in this formation is the best course of action to meet our energy consumption needs. There has already been a spill of chemicals in the northern part of the state associated with Marcellus Shale drilling. Pennsylvania prides itself on its intact natural ecosystems and searching for natural gas will disrupt these ecosystems beyond repair in our lifetimes. Pennsylvania should not step into the past by seeking out natural gas. We should look to the future with cleaner producers of energy.
