To whom it may concern,

I'm very worried that the Marcellus
shale project is going to be the largest ecological
disaster in the state of Pa. The lack of environmental
impact studies and the overriding desire for
revenue are railroading us in the wrong direction.

With the N. York City water supply in
peril from stream + river pollution the
long term legal + financial impact could
be decades in the making. Please review
the looming disaster!

Sincerely
CD Rudy
