INDEPENDENT REGULATORY
REVIEW COMMISSION

Dear Environmental Quality Board,

I propose a fee for anyone from out of state, especially Texas, who come to Pennsylvania to rape and plunder our land. If you want to destroy the environment so bad, DO IT IN TEXAS. We don't need you here. In this idiotically-backward rush to eat up all natural resources with the false pretense of creating jobs, Pennsylvania is letting out-of-state workers take all the jobs, money and natural resources, while we get the benefits of barren, useless landscapes, some of the more horrid drinking water in the country, and that annoying Texas twang that we spent 8 years getting indoctrinated with. Also, now that natural gas is the catch-all for the far right and their "abandoning of foreign oil", how much of the coal that Consol "mines right here in the United States" is actually getting sold overseas? As is usually true with the rampant capitalism these days, they're destroying the lands that we love to make a quick buck overseas. Consol and their high-and-mighty act... We have big rivers in SW PA... why aren't we using more hydroelectric power?

So anyways, you know where I stand. It is up to you to figure it out. And I have a degree in environmental protection, so I understand EXACTLY what the cause and effects are from this swill you call water will do to us. It's pretty bad that sometimes when I take a shower, the water smells like onions, or chlorine, or other chemicals. What do you want to do, kill us to make us stronger? DO SOMETHING AND TRY!

Sincerely,

Ryan Tomazin
