RE: 25 PA Code CH 95  
Wastewater Treatment Requirements  
[39 Pa.B. 6467]

Dear Members of the Board:

Allegheny Mineral Corporation is a crushed stone and agricultural lime producer, operating in Armstrong and Butler Counties with 96 employees. The regulation proposed above will end surface mining in Pennsylvania, as the sulfate limit of 250 mg/l cannot be assured. This secondary drinking water standard is an unwarranted assault to regulated industry, as it has not been properly determined that elevated Total Dissolved Solids (TDS) loading exists.

Therefore, Allegheny Mineral Corporation is requesting that the Department of Environmental Protection withdraw this proposed regulation. The Board's consideration and the opportunity to comment on this proposed rulemaking is appreciated.

Sincerely,

ALLEGHENY MINERAL CORPORATION

D.C. Snyder  
President
