**Subject:** Environment

I am writing to emphasize my support to "highly" regulate the waste water coming from the drilling of gas wells here in Pa. I am very concerned that the environment , including streams, will be impaired with no way to clean them up.

As past President of Donegal Chapter of Trout Unlimited, I have fought for protecting & enhancing our cold water streams. I see a huge problem with the drilling waste water.

Also, I think the gas company's should pay money into a stream cleanup fund that would help fund restoration work throughout the state.

Respectfully yours,  
Bob Kutz
