Subject: 25 Code Chapter 95, Wastewater Treatment Requirements

I am writing to ask for full acceptance of the proposed new regulations on TDS discharges into Pennsylvania rivers issued under 25 Code Chapter 95. Please hold the line on the proposed new standards. I am sickened at the thought of the inevitable toll the relaxed standards will take on our fresh water systems. The state of Pennsylvania and its legislators have made great strides in cleaning up and preserving our precious and beautiful natural resources. Please don't allow those who choose to profit from the gas drilling operations do so at the expense of our environment. I fear we will all live to regret relaxing our standards for these discharges in the future.
