Subject: 25 Code Chapter 95, Wastewater Treatment Requirements

Dear Environmental Quality Board Members--

I am greatly disturbed by the state's unfettered acquiescence to and support of the natural gas drilling industry without regard for the safety of our water and air quality, and therefore the health of our population and our environment. Economic development should not come at the expense of our short-term and long-term health and welfare.

You can do something about this. Please fully accept the proposed new regulations on TDS discharges into our rivers (25 Code Chapter 95). This is a start, but more needs to be done to guarantee clean water and unpolluted air through tough environmental regulations. I hope you will not succumb to the pressure applied and money spent by the drilling industry in an attempt to "buy" votes in their favor on these issues. Please do your duty to the people of Pennsylvania and surrounding states by protecting your families and ours.

Thank you!

Sincerely,
Kathleen Scott
Williamsport, PA
