**Subject:** Chapter 95 Wastewater Treatment Requirements

Dear Governor Rendell, DER, PA Regulators and PA Assembly Members:

I am deeply disturbed by the proposal to extract natural gas from shale rock formations by using chemicals and high pressure to free this greenhouse gas. The fact that this procedure could contaminate groundwater and not setting up a fund by taxing the extraction as a benefit to the citizens of the Commonwealth to clear up the environment is a mistake and morally wrong. Once again it seems the corporates can drill, dig, destroy the environment and leave the citizen tax payers with the bill. This mad pursuit of the quick fast buck and not giving a damn about the environmental consequences is maddening and frightful. Do you represent the people or do you represent the oil, gas and mining companies who put money in your campaign coffers? Do you care about our environment or do you just care about power and money? Which side are you on? The planet and the people or these greedy corporations who don't give a damn about anything but more profits?

Sincerely,

Mr. Paul Roden  
Yardley, PA
