**Subject:** New Regulations for Industrial Wastewater

Hello,

I support new regulations that would limit the limit of TDS that new sources of pollution can discharge into our rivers and streams. I am particularly concerned with the amount of TDS that is produced as a byproduct of drilling in the Marcellus shale. We are still cleaning up our rivers and streams from years of anthracite mining and industrial wastes leached or dumped into our water ways. The health of Pennsylvania citizens and that of it's tourism and sporting industry is at risk. As a life-long citizen of Pennsylvania I have a constitutional right to clean water and I expect my elected legislators to uphold that right for me and my fellow citizens.

Sincerely,

Pauline Palko
