Regulating

INDEPENDENT REGULATORY
REVIEW COMMISSION

I live in Hickory Pa and I have lived and followed the Marcellus Shale Drilling. This Industry is polluting our whole ECO SYSTEM. The TDS levels were not a problem until drilling started. The industry has LITERALLY gotten away with MURDER. The industry has killed aquatic life in streams to the extent, that nothing can survive. The industry has killed and caused mutations in cattle. The industry has destroyed and contaminated many water wells springs and ponds. The industry has also killed the spirit in many landowners hearts and dreams. The Mon River supplies water for many people who now have their health jeopardized. The PADEP has not protected the PEOPLE or the ENVIRONMENT, the existing problems substantiate that. It is about time the PADEP get a back bone and start REGULATING the GAS and COAL industry. MONEY and PROFITS are secondary, WATER,HEALTH and the ENVIRONMENT must be PRIMARY. The GAS and COAL industry must be held accountable for their actions and so should the PADEP. I'm tired of all the LIES being told from industry and all the political contributions being accepted. OUR LIVES depend on industry being REGULATED.
