Dear Pennsylvania Environmental Quality Board,

Please consider these wastewater provisions:

- \* Set health-based standards for contaminants including arsenic, benzene, radium and magnesium
- \* Approve and implement these standards soon
- \* Stop new gas drilling operations until these new health-based standards are set and require sewage treatment plants to follow these proposed standards immediately
- \* Require drilling companies to track and report their pollution from drilling sites to treatment plants, and establish regulations to oversee the reuse of gas drilling wastewater.
