Pennsylvania Environmental Quality Board, The ghosts of the poisoned will hang the carbon
around your weak and listless necks and drag you into the eternal shame that defected
generations will heap upon your souls.....

You deserve none of the respect reserved for stewards of the greatest resource.... the planet itself.

The poison and death you serve up to the people in contaminant soups swirling in the cesspool of
your cost benefit analysis will seek out your families lineage for destruction the same as for us
all.....

Your enduring failures are noted and mark your lives with the feckless insolence of a malevolent
child. There is only one path to redemption for your stilted organization whose acronym bares no
witness to it's name sake..... a total ban and zero emission.

Thomas Brent Holmes
