Dear Pennsylvania Environmental Quality Board,

I live in Dimock PA and we met 2 years ago. I told you then it was not going well in our town- the drilling was in a frenzy without monitoring and the needed safeguards in place. I had witnesses the illegal taking of our creek waters and various toxic spills. You said I was the voice they needed to hear from- well I have been doing all that I can to get the attention and help we need. Your wonderful economic boom will destroy PA as we know it. Are you prepared to accept those consequences? **IT WILL BE YOUR LEGACY!** Act today to call for a moratorium on any further drilling until a study is conducted on the environmental impact and the losses incurred from the drilling. Sincerely, Victoria Switzer-citizen of PA-resident of Dimock PA
