Subject: RE: Beneficial Use of Coal Ash Proposed Rulemaking [25 PA. CODE CHS. 287 AND 290]

RECEIVED

Dec 14, 2009

John Hanger

Dear Hanger,

DEC 23 RECT

INDEPENDENT REGULATORY REVIEW COMMISSION

We hear reports of corruption and collusion by the PA legislators. Is this Rulemaking on coal waste, another example of the flaunting of the needs of ordinary citizens. For the sake of PA citizens and for the fragile earth, close the loopholes and reduce the use of coal. Wake up to the tragic consequences. Make the polluters responsible.

Coal combustion waste (CCW) is contaminating water sources across America including sites in Pennsylvania. Throughout the guidelines that have been proposed there are phrases like, "at the discretion of", "with department approval", or "if the Department chooses." These phrases leave significant loopholes in the guidelines and should be removed. Standards in the proposed Chapter 290 regulations must be enforceable.

This toxic coal ash should be sealed with the use of composite liners and placement guidelines that ensure isolation from groundwater. These sites should be monitored quarterly for at least thirty years after ash placement is finished.

The rules should require that pollutant levels are fully monitored surrounding the placement site. And if a monitoring point shows higher levels of contaminants than prior to ash placement it should trigger a requirement to investigate the causes of those increases.

Also financial assurance should be posted by operators before permits are issued and maintained throughout required monitoring at a site in amounts sufficient to monitor and abate pollution from the ash. And the public should be permitted to participate in the entire permitting process.

Sincerely,

Dr Joann Seaver 663 W Johnson St Philadelphia, PA 19144-3705
