Subject: reference is made to legislation licensing massage

I propose that the word therapeutic be reinstated in the bill for licensing massage/. I am the received or massage therapy for neck problems, and problems of anxiety. It's assistance in my healing and well being is many fold. The absence of the word therapeutic leaves massage hanging out in nowhere land without a grounding in healing. I strongly urge you to consider this and allow massage therapy to continue its evolution in the service of health and well being.

Thank you, Rev Denny Daikeler
