**Subject:** Prposed Law 16A-7101

Please consider the following changes to proposed law 16A-7101. The current proposal limits the number of training resources we have available. We will also have additional cost that is unnecessary to retrain operators that are qualified under other programs. An added cost we certainly don't need considering the current economic climate.

Thanks for your consideration,

Bill Kokemor

Fleet Director

Crane Operators must have a valid certification from a provider that

- provides NCCA or ANSI accredited certifications,
- is recognized by OSHA,
- tests on cranes relevant to the cranes the operator operates, and
- tests on OSHA regulations, ASME B30 Standards, and safe crane operations.

In addition, we suggest that the final version of the law lists all NCCA or ANSI accredited providers simultaneously.
