Subject: proposed training requirements

WOW!! As an employer who works closely with our financial manager and board, I am opposed to these new requirements. I agree that increasing the number of hours required is a good thing, but I would say 12 to 15 is more acceptable. Requiring 24 is a financial burden and for child care providers who do not have their own transportation or internet access it would be a great hardship to meet the new requirements. also it takes time to process and new information and then implement it into our programs.

I am also mad that over and over again you who make the rules for child care provider put a heavier and heavier and more costly burden on those of us who are running child care centers. Not every daycare is making enough profit to meet all the costly standards set forth by NAEYC and others.

I and my staff are moving forward in the stars program, and we are attempting to improve our quality step by step. we want to provide the best we can, but we are also limited by our finances.

I am sure there are many who feel the same as I do. We are frustrated and angry at your constant adding work to our jobs that requires much more and more staff and more and more money/child.

I hope that you will take this email into serious consideration.

Sincerely,

Jessica Perez, BS
