RE: Pennsylvania Department of Environmental Protection's Environmental Quality Board (EQB) proposed amendment to the regulations on Oil and Gas Casing and Cementing, Chapter 78.

Dear Members of the Environmental Quality Board:

I agree with the recommendation by the EQB to update the existing requirements regarding the drilling, casing, cementing, testing, monitoring and plugging of oil and gas wells, and the protection of water supplies.

Communities where drilling takes place are placed in considerable risk due to all aspects of extracting gas in Marcellus Shale. Anything you can do to impose stricter regulations on the energy companies is greatly appreciate.

Sincerely,

Joan Mosey
