**Subject:** natural gas>>>

I think it is extremely important that we regulate oil and gas companies. The residents of PA should be cautious and greedy about how our state is harvested, especially in light of the BP debacle that the Obama administration perpetuated by trying to push for less dependence on our Arab neighbors. If we, the people, do not do our job and watch big business and bigger government the atrocities to our land cannot be blamed on anyone else except we, the people. The gas companies should be charged BIG BUCKS for raping the land and that money should be placed entrust for healthcare and education- the two areas our government is clueless about and now are trying to play catch-up while other countries are laughing at us!! If we educate our people better we would have most fo the issues we have. So rich of a nation we are yet, so poor on sense!

Sincerely,

Dawn Cervellino
