Subject: CH 78 regulations

As a homeowner in both Lycoming and Union counties I am writing to strongly urge you to strengthen regulations on gas well drilling. In particular, adopting the Texas requirement of stronger cement casings on wells, and requiring blow-out preventers on all wells.

Marcellus Shale drilling is still in its infancy and there have already been numerous accidents. We should act now to prevent this industry from causing irreparable harm to our beautiful state and to the health of its citizens.

Sincerely,
Marjorie Priceman
