**Subject:** Support of legislation to increase standards for oil and gas well protections

I am, of course, in favor of increasing the standards for oil and gas well protections. As a property owner in areas that are being drilled, I am very concerned about water quality and contaminant migration. I cannot imagine that anyone could oppose standards that would protect tax paying PA residents and their water supplies. Please stop wasting time and pass this legislation so that folks largest investments, their homes, are not devastated by oil and gas drilling accidents.
