Subject: 25 Pa. Code Ch.78

I urge you to:

1. Put the most stringent regulations in place to ~~protect the water~~ resources of our state from contamination from the gas drilling processes you've permitted. Too much pollution has occurred already in many areas.
2. Hire sufficient state inspectors to oversee the operations without relying on gas company employees to solely make safety reports.
3. Set a moratorium on any more gas drilling until such regulations are in place.

All the money in the world realized to businesses and landowners will be woefully inadequate when water, the source of all life on our planet, is lost in the quest for more and more fossil fuels. I want you to prevent this truly frightening scenario. We depend on you to do the right thing and protect us and the generations ahead.

Thank you,
Connie Borichevsky
