Subject: Proposed change for Marcellus Shale Drilling

RECEIVED

AUG 17 2010

INDEPENDENT REGULATORY
REVIEW COMMISSION

This opinion is from Dale Emmart Lieberman 446 Kellows Road Honesdale PA 18431 (Wayne County)

I demand greater regulation and Environmental Impact Studies to be imposed on The Proposed Drilling of Marcellus Shale in Pennsylvania.

Drilling may help the under protected farmers with fleeting monetary solutions but the environmental damage to our aquifers, surface water systems, farm and wild animal life, and air quality is unacceptable. Our road / bridge infrastructure is not equipped to access heavy truck loads of chemical cocktails and waste products. Our state has not prepared deposit sites for drilling waste. Our citizens are not being fairly informed by Gas Companies as to potential risks that are irreparable to our environmental balance.

I believe massive drilling using chemical fracking technology jeopardizes OUR basic right to Public Health and environmental balance.

I strongly support the following:

The people have a constitutional right to clean air, pure water, and the preservation of the natural, scenic, historic and esthetic values of the environment.
