Subject: CH 78 Regulations

To Whom it May Concern;

This email is in regards to the Chapter 78 regulations governing drilling in PA's Marcellus shale. I am asking EQB to adopt the more rigid standards as set forth in the proposal made by Harvey Consulting.

My main concern is the protection of our water supplies. DEP did not recommend any revisions to set a timeframe for acting upon a complaint filed for pollution of a water supply. I feel this should be a number one concern. We citizens do not get a 2nd chance with our well water. If our wells become contaminated our homes are worthless. The gas industry will do whatever is necessary to tie things up in court. Citizens must be protected!

Thank you
