from Gerry Givnish  
4825 Germantown Ave  
Phila., PA 19144

Pennsylvania is still a beautiful state but with money to be made from drilling wells, our magnificence of nature is threatened.

Animal habitat will be carved up and crisscrossed with roads, songbirds will be silenced by the roar of trucks and drilling. our night which are made for sleeping will be illuminated by industrial spotlights. Our natural gas resources will enrich absentee capitalists and leave to us a bleak landscape. Unless we proceed wisely,

We are not owners but stewards of the land.. The Commonwealth consists of resources like rivers, mountains, forests, all of which no human power could bring forth. As we proudly call ourselves THE COMMONWEALTH of Pennsylvania, let us protect our natural resource for the common good
