Subject: CH 78 Regulations

To the Environmental Quality Board:

We applaud your efforts to protect environmental quality in PA. Please include in the new Chapter 78 regulations the proposals of the Harvey Consulting report. As a homeowner with spring water, I am especially concerned about protection of our water supplies. Specifically, I urge you to adopt the same cement strength standards set in Texas. And having personally heard the reports of homeowners' water problems being ignored or ridiculed by the gas companies, I believe there should be a 24 hour response time on complaints about water. Thank you.

Sincerely,
Priscilla Older
