Re: Department of Health-Emergency Medical services System  
Regulation #10-190 (IRCC#2917)

Dear Sirs;

I am writing to recommend your approval of Reg #10-190, regulations to EMS ACT 37. These final form regs are consistent with national standards. Approval will allow for a better coordinated EMS system with the flexibility needed to address future developments. Important regulatory improvements include recognition of services like the critical care ground ambulance and certain other operational services including tactical and wilderness EMS. Our state regs will match national models including the advanced EMT. EMS educational institutions will have accreditation / reaccreditation standards developed and trauma centers will have the opportunity for further integration into the statewide system.

Thank you for your long and hard work into bringing these regulations to fruition. Please give them every consideration and your final approval.

Respectfully yours,

Alex M. Rosenau, DO, CPE, FACEP, FACOEP  
President-elect, American College of Emergency Physicians (ACEP)  
Past President, PA Chapter, ACEP ( PA ACEP)  
Co-Medical Director, Eastern EMS Council
