Subject: Triennial Review of Water Quality Standards (IRRC #2954)

IRRC

JUN 17 AM 10:09

Dear Members,

Protection of our fresh water supplies must be a fundamental tenant in the state's environmental policy. The Independent Regulatory Review Commission (IRRC) must reject the final-form Triennial Review of Water Quality Standards, due to the lack of any standard for levels of salt (chlorides) in our rivers. Companies dumping oil and gas wastewater containing millions of pounds of salt must be required totreat their wastewater, just like everyone else.
