Subject: Triennial Review of Water Quality Standards (IRRC #2954) 2013 JUN 17 AM 10:08

Dear Members,

. I urge the Independent Regulatory Review Commission (IRRC) to reject the final-form Triennial Review of Water Quality Standards, due to the lack of any standard for levels of salt (chlorides) in our rivers. We need to make sure a chloride standard is included in our state water quality standards.

To do so otherwise makes no sense for the electorate. It doesn't make sense healthwise or financially for individuals or the government. It only makes sense for the polluters and those they back.

Steve Clifford
