Subject: Triennial Review of Water Quality Standards (IRRC #2954)

2013 JUN 18 AM 8: 59

Dear Members,

I urge the IRRC to reject the final-form Triennial Review of Water Quality Standards, due to the lack of any standard for levels of salt (chlorides) in our rivers. We need to make sure a chloride standard is included in our state water quality standards.

Companies dumping oil and gas wastewater containing millions of pounds of salt should have to treat their wastewater, just like everyone else. Please help us get proper protection for our Pennsylvania rivers.
