To Whom It May Concern,

I would like to voice my support to change the rules surrounding amateur mixed martial arts. It does not make sense for Pennsylvania to have rules and regulations that are contrary to other states, when there have been many fights and much evidence that the ABC amateur rule set is quite adequate and safe for the fighters. I would like to commend the State of Pennsylvania for regulating mixed martial arts as states without regulation have seen fighters taken advantage of and seriously injured. However like I stated before I feel that being more uniform with other states such as Nevada, New Jersey, California and Texas will result in many good benefits to the state of Pennsylvania, including the growth of local mixed martial arts as well as an increase in events being held within the state, thus increasing tax revenue.

Thank you for your time,

Roger Anderson, III
