A new message has arrived from the IRRC Website

First Name: Heather

Last Name: Cutlip

Company:

Email: jcutlip@npacc.net

Subject: Common Core

Message:

Thank you for considering the topic of Common Core. We have been watching the ongoing battle regarding this blatant disregard for childhood learning methods, parental rights and privacy and are very concerned. If our opinion bears any weight, as parents we would urge you to reject common core in the State of Pennsylvania. We are concerned that it dumbs down our students, will cost more money than anticipated (as tends to happen with most government funded ideas) and requires personal information to be registered about the students in a way that is unconstitutional. There is so much to say about how bad this program would be for our state... I would beg of you, to please refuse to bow to it.
