Subject: Common Core

Message:

Hello: I am very concerned the implementation of Common Core within the school districts of PA will have a devastating effect on our young people by needlessly complicating math, erroneously reporting on history and severely limiting the reading comprehension of our young people. Instead of a national one size fits all program, I believe we need to move towards more local control that considers the unique set of situations in each of PA's school district. Please do not implement Common Core in PA. John Steffee
