Subject: Common Core

Message:

Why would we want a step backwards with our children's education. Go back to the 1800's see the questions asked on 8th grade final exams, I really wonder if our students today could answer the questions? We need to teach the basics and stop trying to mold children into something the government wants. Federal Government needs to stay out of Public Education and let the States handle that. One size does NOT fit all. Thanks
