Subject: Common Core

Message:

I am writing to request that you, the regulatory body in Pennsylvania, put a stop to Common Core. The education system in this country definitely needs to be improved upon but Common Core is not the way to do it. Common Core threatens the freedoms each of us as American Citizens holds dear. Common Core threatens to "dumb down" our curriculum standards and re-writes the history of our country. We need to go back to standards that used to be in place years ago. Common Core also threatens to take away local control of schools. Schools should be run by their communities - not the federal government. The federal government needs to keep their noses out of our personal and local/state business. The data collection that Common Core will put into place threatens the right to privacy for each and every student and their families. Please do not allow this take over of education in our state. Take a stand against the take over that the government is trying to put into all our lives. Defeating Common Core is a step towards reclaiming our Constitution and our freedoms. Respectfully submitted, Margaret Hagerty
