I worked in our local school district for 30 years before retiring..having talked to some of the teachers now teaching/ I would not fit in to this mess/ would not approve of it al all/ just talking to some kids in my neighborhood school aged kids, find that a lot of the "old school" type subjects are just not being taught..this is very important that they know the Constitution and our American history.. not this garbage that is in the Core agenda..do not belive the gvt. has any business knowing info on our children or any part of thier education..our science/math/history are very important
