**Subject:** Stopping Common Core

**Message:**

What has the Federal government EVER taken over and improved? The Post Office? Amtrak? If they weren't Federal they would have gone bankrupt long ago. They want year round school (25% more of our tax dollars for that) and their goal is to dumb down students and take away all control from the local communities. The last thing we need are unaccountable, unelected Federal officials dictating more ridiculous rules that have nothing to do with reality. And once they take over, we will NEVER be rid of their meddling! Please stop Common Core now!
