**Subject:** The Keystone Graduation Exams—Huge Expense to Taxpayers, Terrible unfairness to Students  
**Attachments:** 8ReasonsAgainstKeystones.pdf

Dear sirs:

I am including all of Senator Andy Dinniman's clear analysis of the flawed proposed Keystone Graduation Exams in hope that you all will read it carefully and revisit your proposal. I sincerely hope that you will drop this terribly ill-conceived proposal and avoid further damage to our state's students and taxpayers. It is bad enough that Governor Corbett has slashed state support of education annually and put all our school programs at risk state-wide. Is this another way that the governor is creating state jobs?

Please don't add another burden of tax-funded bureaucracy to our financially strapped voting commonwealth citizens. Spend the money restoring aid to education and social services that the governor has stripped away.

Sincerely,

James. F. Scharnberg, 20 Beatty Lane, Malvern, Chester County, PA 19355
