Dear IRRC,

I'm writing to you as a concerned parent. Common Core threatens to dumb-down curriculum standards, take away local control, and collect personal data on every student and their families. And the government will take even more of the taxpayers hard earned money.

If you aren't aware of everything that goes along with Common Core I encourage you to check it out thoroughly. I'm worried if Common Core is implemented the affects will be devastating for students now and in the future.

Please, Stop Common Core!!

Sincerely,

Danette E. Gillespie
