Subject: A Mother's plea to stop Common Core

Message:

Not a single state or even a single school district has ever used the Common Core Curriculum. There is no evidence that it works. No foundation to build off of. Yet nearly every state has opted in because if they didn't they wouldn't receive federal grant money. It has no track record. That is extremely scary to me. What if it fails? It's different from No Child Left Behind, this is a complete change to our children's curriculum. Our children are Guinea Pigs to our Federal Government. This may very well ruin them. Then what? It needs to be stopped. How many PA residents knew this was going to take place this year? Very few. How can our schools make these decisions without input from the parents, teachers, legislators? In the words of the Russian Communist Vladimir Lenin "give me four years to teach the children and the seed I have sown will never be uprooted." Sound familiar? Please stop Common Core.
